SUMMARY

Computer Science undergraduate (Class of 2027, CGPA 9.49/10) with strong fundamentals in Data Structures & Algorithms, Object-Oriented Design, Operating Systems, and Complexity Analysis. Backend engineering experience designing, building, and deploying production REST APIs in Python/FastAPI. 260+ LeetCode problems solved; actively strengthening algorithmic problem-solving (graphs, dynamic programming, heaps) through structured daily practice.

EDUCATION

C.V. Raman Global University, Bhubaneswar, Odisha

2023 – 2027

B.Tech in Computer Science & Engineering — CGPA: 9.49 / 10

TECHNICAL SKILLS

Languages: Python, Java, C, JavaScript

CS Fundamentals: Data Structures & Algorithms, Complexity Analysis, Object-Oriented Design, Operating Systems, DBMS & Relational Databases, Computer Networks

Backend & Tools: FastAPI, Flask, REST API Design, Asynchronous Programming, Git, GitHub, GitHub Codespaces

ML / Data: NLP, Sentence Embeddings (ONNX Runtime), Scikit-Learn, Pandas, NumPy

EXPERIENCE

AI / Prompt Engineering Intern — Mirai School of Technology (Remote)

Jul 2025 – Aug 2025

- Built and evaluated 20+ multi-step LLM prompt chains for automated business workflows, troubleshooting failure cases and iterating to improve accuracy and consistency.
- Automated multi-step workflows using n8n, integrating LLM outputs with external tools to reduce manual task handling.
- Collaborated with the team to translate business requirements into working automated processes, communicating issues and fixes clearly across iterations.

PROJECTS

CareerLens AI — Resume-to-JD Matching Engine

Python, FastAPI, REST APIs, NLP, ONNX Runtime

- Built and deployed a production REST API service (Render) in FastAPI performing semantic resume-to-job-description matching.
- Implemented a text-embedding pipeline using fastembed (BGE-small, ONNX runtime) and PyMuPDF for low-latency PDF parsing and semantic similarity scoring.
- Designed asynchronous request handling to support concurrent resume evaluations, improving throughput over an initial synchronous implementation.

SwarajDesk — AI Grievance Image Classification System (Team Project, SIH 2025)

Computer Vision, FastAPI, Python

- Collaborated in a multi-engineer team to build an image-classification pipeline for automated civic-complaint routing; coordinated tasks and merged work within a shared Git repository under hackathon timelines.
- Owned dataset collection, cleaning, and validation across multiple complaint categories; investigated misclassifications by tracing model outputs against expected categories to improve pipeline reliability.

CODING PROFILE & ACHIEVEMENTS

- LeetCode: 260+ problems solved (77% acceptance) | Contest Rating 1486 (9 contests) — leetcode.com/u/FXyzwjysre
- ISRO Internship Provisional Selectee — Satish Dhawan Space Centre (SDSC SHAR)
- Smart India Hackathon (SIH) 2025 — National Finalist, AI-powered civic grievance redressal system
- CS50: Introduction to Programming with Python — Harvard University
